

Lyftman floor mounted crane systems

Knuckle jib crane in stainless steel

This knuckle jib crane is in stainless steel configuration for a client in the chemical manufacturing industry in Denmark. Max rated lifting capacity is 50 kg this version. Arm length 2 x 1,65m and column height 2,4 m.

A vacuum lifter with side lifter suction foot is installed in the knuckle jib. The air tube is incorporated inside the arm profiles and runs through to the next room where the vacuum pump is placed.
