

VacuEasylift VM120 sacks in lowbuilt crane system

Project supervisor: Mark Roberts, TAWI UK Ltd
Industry: Confectionary industry/
chocolates
Lifting: Plastic sacks
Used with: VM120 with extra spiral distance
in low built crane system
Max capacity,
this version: 40 kg

Sack lifter in very low head room. Lyftman low built crane system combined with VacuEasylift VM120 with extra spiral distance solves the problem. Suction foot for sacks, 30320.

It is hard to believe that the VacuEasylift can be used with a suspension point this low!
